

Spring BootJava  $\Rightarrow$  objectSpring Bean  $\Rightarrow$  BeanSpringIOC  $\Rightarrow$  Inversion of Control  
ContainerAll  
Beans  
are store

```

class A {  $\longrightarrow$  class B {
    }
    }
  
```

Example[Java]

class A {

```

    public A () {
        }
    }

    class B {
        public B (A a) {
            }
        }
    }

```

A a = new A ();

B b = new B(a); → B object created.

## Example Spring Boot

DI → Dependency Injection

@Component

```

class A {
    public A () { }
}

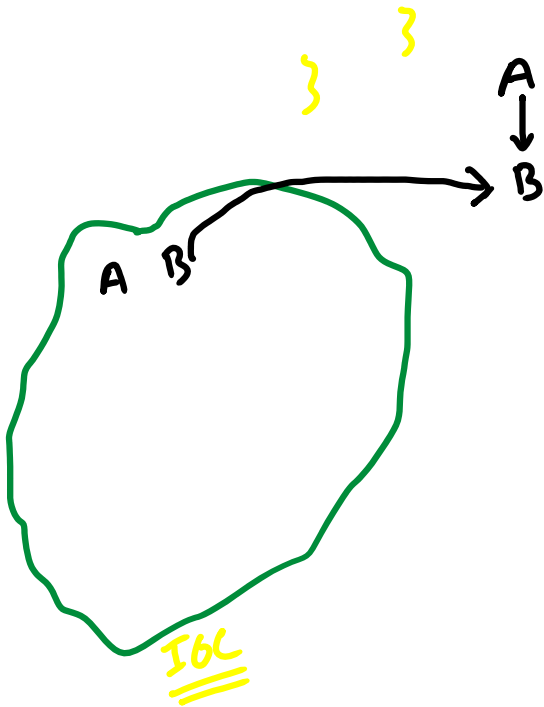

```

@Component

```

class B {
    public B (A a) {

```

## DI types
